GREEN GRAFX PHOTO PAPER INFORMATION

Our Green Grafx Photo Paper 220gsm with stain finish is a fully recyclable photo paper is the only environmentally friendly alternative to PE-filmed photo papers – with brilliant print and colour results and 100% quality and finished with a bio-based barrier and microporous coating.

In addition, the bio-based barrier has further advantages: It enables very good flatness, even with high ink application, and makes the material less sensitive to fluctuations in temperature and humidity. The microporous coating is optimised for water-based ink systems and enables excellent colour reproduction as well as a wide colour gamut and fast drying. This makes it ideal for indoor printing for photography, art and poster applications.

Green Grafx Photo Paper: 100% quality. 100% recyclable

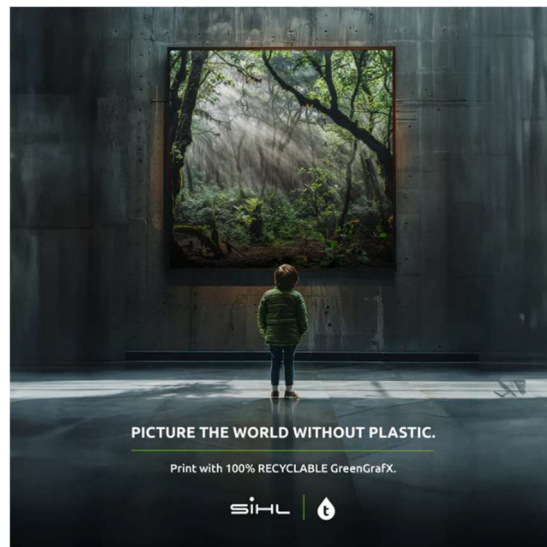

Sustainable Benefits

100% recyclable via the waste-paper cycle thanks to biobased barrier

FSC® certified

Digitally printed using HP latex inks, which are Eco logo and Green Guard Gold certified

The environmental performance is the recyclability of used HP consumables. All HP 831 printing supplies— including ink cartridges, printheads, and maintenance supplies are recycled through the HP Planet Partners program.

Advantages

Brilliant colour reproduction

High resolution and excellent image sharpness

High ink absorption capacity and fast drying

Very Good Flatness with a Bio Based Barrier

Less Sensitive to Fluctuations in Temperature and Humidity

Microporous Coating - Optimised for Water-Based Inks
