

ECO PEEL AND STICK WALLPAPER INFORMATION

My Wall Space ECO Peel & Stick Wallpaper is a premium, slightly textured white matt non-woven 340-micron self-adhesive **PVC-free** wallpaper media which is removable, made with outstanding print quality in mind.

It has been designed for hassle-free installation, and can be applied within minutes, thanks to its specially formulated adhesive that allows for multiple applications and removals without any complications.

Sustainable Benefits

Eco-friendlier with NO PVC

Utilizes a water-based adhesive, free from hazardous chemicals.

Clay Coated Kraft Release Liners offer recyclability, making them environmentally friendly alternatives to non-recyclable liners. Clay Coated Kraft Release Liner refers to a type of paper liner that is coated with a layer of clay on one side.

Digitally printed using HP latex inks, which are Eco logo and Green Guard Gold certified

The environmental performance is the recyclability of used HP consumables. All HP 831 printing supplies—including ink cartridges, printheads, and maintenance supplies are recycled through the HP Planet Partners program.

Benefits

Features an anti-glare, matte finish that reduces light reflection.

Easy to apply and reposition and is removable

Does not require wallpaper paste, ensuring a clean application process.

My Wall Space Advice for Extra Protection for High Traffic Areas

We recommend contacting VIPONDS Paint in Victoria for liquid laminating products for custom printed wallpaper using HP Latex Inks.

Helpful Information

It is essential to ensure the walls are wiped clean and free from dust and dirt. Apply with a squeegee ensuring plenty of pressure to get sufficient surface contact with the glue and the paint.

There are many variants in paint. For 100% peace of mind on painted surfaces we recommend testing compatibility prior to use.

Allowing the wall paper to acclimatise in the room it will be applied in for a minimum of 48 hours before application gives the best results.

For newly painted or damaged walls use a water-based primer/sealant prior to installation.

For damaged walls we recommend the Zinsser product GARDZ available from most paint and hardware stores. www.rustoleum.com.au

For newly painted walls we recommend the Viponds self-adhesive prep coat for newly painted walls. www.viponds.com.au
